

Business operations policy

Environment, quality and business operations

At the ÅF Group, we aim to ensure successful, sustainable long-term development both for our clients and for ourselves.

We accomplish this by incorporating the following procedures into the ÅF Group's consulting operations:

We implement systematic, standardised working practices underpinned by high levels of quality and environmental awareness.

We adopt an approach to problem-solving that puts equal emphasis on the requirements and quality criteria of the client and on due consideration for the environment.

We make efficient and economical use of energy and natural resources in our day-to-day operations, we work to prevent pollution and we observe both the letter and the spirit of all relevant legislation.

We work together with our clients to produce the best possible solutions from the point of view of quality, technology and the environment.

We continually develop the skills and expertise of our employees and constantly improve our working procedures.

Jonas Wiström
President & CEO
